## Objetivo de la práctica

En esta práctica se trabaja con Qlik View. Se tomar y cargar como fuentes de datos 3 Excels (Calls, Products, Master\_Data) que representan ser datos de una farmacéutica. El objetivo es crear un documento Qlik a través de comandos y programación que:

- Cargue los datos de los excels.
- Transforme la información de los excels en un modelo de datos siguiendo las recomendaciones dadas:
  - a) Crear un modelo estrella.
  - b) Unir tablas adecuadamente con left, right, inner o outer joins y borrando las tablas sobrantes.
  - c) Concatenar tablas de forma efectiva borrando las tablas sobrantes.
  - d) Evitar el uso de tablas sintéticas (Syhtetic tables) o bucles (loops).
  - e) Usar origen (origin).
- Presente la información de dichos datos en forma de gráficos, tablas o números.
  - a) Creando al menos 2 páginas
  - b) Usando al menos 3-4 gráficos distintos.
